Your Message

Hello,

I have a few questions regarding Pabbly Chatflow and WhatsApp marketing.

Currently, I want to send bulk promotional WhatsApp messages to my hospital patients. I have already connected my WhatsApp Business number in Pabbly, but its status shows "Connected without review." What does this mean, and how can I change it to a fully reviewed/verified status?

I am planning to purchase the Pabbly Chatflow Standard Plan (₹1,279/month billed annually). Do you think this plan is suitable for my use case of sending promotional WhatsApp messages to hospital patients? What features and benefits will I get with this plan?

Yesterday, I submitted my WhatsApp message template for Meta approval, but it is still showing "Pending." How long does approval usually take, and is there anything I can do to speed up or resolve the approval process?

Also, if I subscribe to the Pabbly Chatflow Standard Plan, will WhatsApp template approvals be

included, or are there any additional charges from Meta for template messaging or conversations?

Thank you. I look forward to your guidance.
